DS1000D/E Series Oscilloscope Specifications

All specifications apply to DS1000E, DS1000D Series Oscilloscopes and a probe with the Attenuation switch set to 10X unless noted otherwise. To meet these specifications, two conditions must first be met:

- The instrument must have been operating continuously for thirty minutes within the specified operating temperature.
- Do perform the Self Cal operation, accessible through the Utility menu, if the operating temperature changes by more than 5°C.
- All specifications are guaranteed unless noted "typical".
